## The right light for your warehouse

Ansa Led has a wide selection of LED luminaire fixtures for area. We offer lighting for warehouse, factory, logistics and more. The OPAIR is an outstanding value for a wide variety of applications and mounting heights.

Precision designed optics, lumen outputs and color temperatures make the OPAIR an ideal one-for-one replacement of conventional high bay systems such as HID and fluorescent for industrial, commercial, manufacturing, gymnasium.

The OPAIR Series can be fully dimmable and is compatible with building controls, motion sensors and daylight harvesting systems. The brand name LED's enable long life, high lumen maintenance and output.

## The Keys to Optimal Warehouse Lighting:

### All Applications

- Indoor or outdoor lighting (Wet Location available)
- Workshops
- Indoor stadiums
- Warehouse

### Main Features:

- Excellent heat dissipation ADC12# AL housing, anti-corrosion powder coated finished.
- Water-proof silicon rubber gasket.
- High thermal conductive material and high efficiency cooling system. Junction temp. <70 °C.
- LM80 approval LED chip ensures excellent performance.
- Surface light, soft and healthy, no double shadow.
- IP Rating IP65.

TAKE A LOOK  
UNDER  
THE  
HOOD

**SHATTER PROOF  
PC LENS**

Shatter proof IK10 rated PC lens provides extra safety in the work place and makes it suitable for food area.

**HIGH OUTPUT  
BRAND LED CHIPS**

Ultra efficient Cree 3030 (or Lumileds 3030) chip, up to 150lm/W system efficacy. (Standard, 130lm/W)

### LOOP

Single point suspension for quick and easy installation. (Bracket accessories available)

### WE'VE GOT YOU COVERED

Our professionally designed aluminum cover protects against dust, moisture and other environmental contaminants.

### BREATHER

A breather allows the OpAir to constantly breath with changing temperatures, preventing condensation while ensuring an IP65 seal.

### BRAND DRIVER

The linear MW driver (or Sosen driver) is fixed under the cover and kept away from the heat sink to assure the driver's lifetime.

### HIGH PURITY ALUMINUM HEATSINK

Our optimised heatsink is made of ADC12# aluminum with excellent thermal management helping the highbay stay cooler & more reliable.

## Light distribution curve

## Microwave sensor

### 3-step dimming function

Lamps in corridor are controlled by several sensors. Once any motion is detected by one of sensors, the motion signal will be transmitted to other sensors connected together. Then, all lamps switch on at the same time, instead of switching on the lamps in the area where motion is detected.

1. No motion detected, all lamps switch off.

2. Any movement is detected from any direction, all lamps synchronously switch on.

3. No motion is detected in detection area, all lamps synchronously dim to a low light level after hold time.

4. After stand-by period, the lamps switch off if no movement is detected in the detection zone.

## Daylight sensor

When used in combination with daylight sensor, the system has automated controls that either turn off or dim artificial light in response to the available daylight in the space.

Ambient light larger the preset illumination level (Set by 1-10V daylight sensor), the lamp stays off.

Ambient light below the preset illumination level, the lamp switches on when motion is detected.

The lamp lights on 100% illumination or dims to maintain the preset illumination level against the level of ambient light.

If with sufficient ambient light, the lamp turns off at once, even with motion trigger.

If with insufficient ambient light, the lamp dims to stand-by dimming level (Set in the motion sensor) when no motion is detected after hold time, and then switches off after stand-by period.

## Smart High Bay available

Wireless controlled by Phone/computer  
Saving more energy  
Intelligent and easy to operate

## OPBAY SERIES

OpBay LED High bay, low cost, excellent heat dissipation, easy installation for supermarkets, warehouses, factories, docks, exhibition halls, waiting room, and stations.

Top performance & Less size than OpAir, means you can save on freight.

### BRAND LED CHIPS

High quality Lumileds 3030  
(Or Osram 2835), up to 130lm/W.

### SHATTER PROOF PC LENS

Shatter proof IK10 rated PC lens  
provides extra safety in the work place  
and makes it suitable for food area.

### STAINLESS STEEL SCREWS

Stainless steel not only ensures the strength  
but also eliminate the risk of possible fracture  
caused by corrosion when being used in  
harsh condition.

### GOOD QUALITY LED DRIVER

Split-type external driver is conducive to heat dissipation, improve driver efficiency and life span.

### BREATHER

A breather allows the OpBay to constantly breath with changing temperatures, preventing condensation while ensuring an IP65 seal.

### EXCELLENT HEAT DISSIPATION

Ventilation convection design enables fast heat dissipation. The single-piece extruded heat sink adapts aluminum ADC12 as raw material for the best effect of the best effect of heat management.

# OUTDOOR LED LIGHTING

# OPSUN SERIES

*Enjoy your sports*  
With OPSUN LED Flood light

## The right light for your sports fields

Ansa Led has a wide selection of LED luminaire fixtures for outdoor sports lighting. We offer lighting for soccer, football, baseball, hockey, basketball, tennis, lacrosse and more. Although each sport may have its own specific issues when it comes to proper lighting, there are several consistent variables in designing sports lighting.

Our OPSUN outdoor sports lighting products limit environmental impact by reducing glare, light spillage, and sky glow.

Beyond the product, Ansa Led is committed to providing our customers with unparalleled support in lighting design program.

## The Keys to Optimal Sports Lighting:

### All Applications

- Uniformity and light quality
- Light pollution and spillage
- Controls

### Baseball, Softball

- High levels of illumination
- Lighted from all sides
- Reducing glare

### Football

- Pole location (primarily sidelines)
- Pole quantity
- Number of fixtures per pole

### Soccer, Lacrosse, Mixed Use

- Pole location
- Pole quantity
- Number of fixtures per pole

### Basketball, Tennis

- Floodlight, or area-style fixtures
- Court configuration (grouping)
- Court access

### Other application:

Sea port, airport, tunnel,  
and other industrial area.

## Excellent cooling performance

The OPSUN has been designed with cooling in mind, Our modular design allows for efficient cooling via convection through the structures ventilation and to ensure the complete system life is maximised we housed the Mean Well driver in a separate chamber away from critical LED components.

## Color finishes

The color options: black, white, grey and bronze. Custom colors are available.

## Built to last

To ensure the OPSUN will survive even the toughest of conditions we constructed it out of a low copper content aluminium alloy and coated it with a high performance pure epoxy anti-corrosion protective coating. For extra protection make sure to combine it with our 316 stainless steel bracket.

## Custom wide beam profile

The OPSUN comes standard with an asymmetric wide beam angle profile for improved coverage and reduced light spill.

## Flexible design options

The OPSUN offers flexible design options including 6 different stocked beam profiles including symmetric and asymmetric and multiple color temperatures ranging from 2500k to 6000k. Other options include RGBW colors, single colors, and dimming.

## Easy installation

Universal mounting bracket and angle adjustment dial makes installing the OPSUN a breeze.

## From small projects to large, we have you covered

The OPSUN offers a large range of wattages giving you maximum flexibility when designing the smallest project to the largest. By using quality components we are able to achieve up to 150lm/W throughout the range topping out at a massive 93,000 lumens.

Metal halide lighting has a strong light which causes glare. For this reason, it makes it difficult for athletes to secure the optimal view during a competition.

Glare control is a major variable in the design of an optimal luminaire. OpSun can build your fixture utilizing one of a number of different standard glare shields, or we can even customize one for your application.

With Enhanced Glare Mitigation and Specialized Beam Shapes we are able to paint the playing surface with Smooth Light and keep your neighbours dark and happy. The asymmetric optics produce the ideal distribution and beam angles for LED stadium lighting, while saving you up to 70% or more in energy use when compared to traditional stadium lighting. The durable housing, protective lens, and brand driver are engineered for stadium lighting applications with the ability to withstand extreme outdoor conditions.

## Laser Pointer

Contractors can now install the OpSun during the daytime and be easier they can meet the lighting design specification with laser pointer.

## IP67 & IK10

OPSUN comes with a waterproof connector inside. Each LED module is equipped with double water-proof rubber, preventing water to spray in. Additional, OpSun gets a IK10 impact-resistant grade, which provides better protection for outdoor usage.

## Detachable External Driver Box

According to actual situation, 99% failures of LED floodlight are caused by drivers. In practical use, even branded driver should encounter problems.

The external driver box is designed to either sit behind lampbody on the top of mast or remotely be placed at the bottom of mast for easy access of wiring and driver maintenance.
